

**Kentucky Department for Public Health
Diabetes Advisory Committee**

The committee was created by an administrative order on November 30, 1982. It was originally a subcommittee of the Council for Health Services and replaced the former Diabetes Special Study Commission. The functions of the Diabetes Advisory Committee are to:

- Provide advice and consultation on diabetes
- Ascertain and define needs related to diabetes
- Review and comment on the role and activities of the Department for Public Health relating to diabetes
- Perform such other functions relating to diabetes as may be assigned by the Commissioner of Health or by the Public Health Services Advisory Council

The committee meets in Frankfort twice a year, usually in April and October. Various organizations, disciplines, and consumers are represented within the committee membership. The current chairperson is:

Vasti Broadstone, M.D.
University of Louisville
530 South Jackson Street
Louisville, KY 40292
